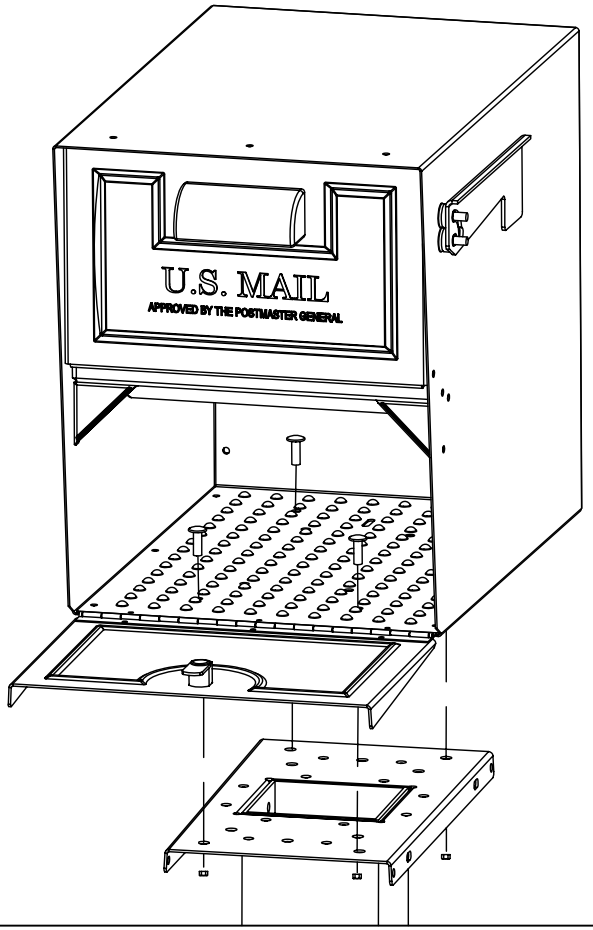
Tools needed:
-Phillips head screw driver
-3/8'' open-end wrench

For Mailbox Model # DMSK or AM20

Post Mounting hardware Not Included



GIBRALTAR INDUSTRIES
Taylorsville, MS
39168

Customers are required to contact the local post office before installing the mailbox to ensure its correct placement and height at the street. Generally, mailboxes are installed at a height of 41 -45 inches from the road surface to the inside floor of the mailbox or point of mail entry (locked designs) and are set back 6 - 8 inches from front face of curb or road edge to the mailbox door.

Assembly to Solar Mounting Plate

(hardware included with post kit)
Attach mailbox to mounting plate with (4) #10-24 screws and (4) #10 hex nuts.

Assembly to Pine Board (PMB)

Using the holes in the bottom of the mailbox pre-drill holes in the wood and secure the mailbox to pine board with wood screws (hardware not provided)

Care and Maintenance

The mailbox body is protected by a rust resistant powder coat paint. with a minimum amount of maintenance, your mailbox can look like new for a long period of time. Like any outdoor product made of steel, surface rust may appear over time depending on its placement or environmental conditions. wipe any surface rust with a steel wool pad and clean with a damp cloth and household detergent occasionally. coat your mailbox with a high quality car wax and your box will retain its finish. If necessary, touch up paint may be required to maintain the mailbox and extend its useful life.
